COLLAMASK - THE YOUTH AND BEAUTY OF SKIN AT ANY AGE

CUSTOMER TESTIMONIALS

Maria, 38 years of age:

"It was my friend who recommended me to buy CollaMask. The first wrinkles showed up early - when I was 33. For financial reasons I couldn't allow to do a facelift and using creams and other widely advertised products yielded very little results. This mask is ideal for me. A lovely product that helped me to regain the youth. Now I look like 10 years back, what I am very happy with".

With age, face skin loses firmness and elasticity. And age-related changes as well as changes in hormonal levels contribute to that, leading to the loss of calcium and moisture. Reduced synthesis of estrogen, primary female beauty hormone, negatively affects the visual appearance: the skin begins to wrinkle and sag, facial contour becomes less defined and fit.

Until recently, dealing with such problems was only possible using rhytidectomy - a tuck-up operation using surgical techniques. The procedure has certain risks and can lead to complications and therefore scientists have developed a solution to help manage the problems of aging skin and prevent their occurrence. We are talking about CollaMask - the collagen wrinkle mask.

THE SECRET OF YOUTH

CollaMask is a face mask that has the texture of a cream. The mask is comprised of only natural ingredients that quickly penetrate to the deepest layers of the epidermis restoring the work of damaged cells, enrich tissues with oxygen and maintain the needed level of moisture content. The result is a fit, firm and radiant skin at any age.

The uniqueness of the mask is in an instant effect and high efficiency. Visible results can be achieved after the first use, the components of the cream don't lead to addiction and there is no need for constant use.

HOW DOES THE MASK WORK?

The search of physicians testaments about CollaMask in the UK shows that the cream recommended by leading dermatologists, cosmetologists and even plastic surgeons. The systematic use of the mask allows to achieve the following results:

cleansing and pore contraction for oily and combination skin;

increased turgor (firmness) and elasticity;

reduction of rhytids and deep wrinkles;

face contouring

skin colour smoothing;

control of skin problems (acne, comedones);

moisture retention in the cells of the epidermis;

restoring the functioning of damaged cells (as part of a complex therapy of cosmetic skin defects).

Important! Amino acids in the mask's composition enhance the protective properties of the dermis and improve tissue immunity. If used regularly the active ingredients promote the removal of radicals, toxins and other toxic substances from deep layers of the skin.

The price of CollaMask in the UK is less than the cost of one facial care procedure in a beauty shop and if compared with the cost of a tuck-up operation, the advantage of the mask becomes evident.

CANDID INGREDIENTS FOR YOUR BEAUTY

Composition of CollaMask is 100% natural. The mask's production is free of any harmful ingredients that could cause allergy, irritation or invoke inflammatory processes. All of the mask's components are carefully examined and undergo decontamination, and therefore the mask has discernible hypoallergic properties.

Component composition:

Ingredient	Effect
Collagen	The main component of a healthy and beautiful skin. This protein makes the skin smooth, supple, flattens roughness, makes the contour well-defined. Helps to restore damaged cells.
Amino acid complex	Enhance antioxidant characteristics, remove radicals and toxins from deep layers of the epidermis.
Palmarosa (oil)	Kills germs and bacteria, has discernible antiseptic properties.
Blue clay	Removes excess sebum and dust, contracts pores . Tones up and refreshes the complexion.
Betaine	Normalizes water balance, harmonizes the complexion.
Sodium alginate	Extracted from marine algae (fucus, laminaria). Removes toxins from the skin.

To achieve maximum results it is necessary to know how to apply CollaMask in a right way.

HOW TO USE?

CollaMask manual in the UK does not recommend to use the mask more often than 2 times a week. To sustain the beauty and youthful look the mask should be used regularly according to the instruction.

Cleansing. Before using the cream cleanse the face from dust, dirt and cosmetics. It is possible to steam the skin in the shower or over a wash-basin with hot water.

Applying the mask. Thickly lay a small amount of the cream onto the face and leave for 15-20 minutes.

Removal. Wash off the mask with warm water (without washing agents).

Moisturizing. Apply moisturizing gel or cream suitable for a particular skin type. Where to buy?

The mask's popularity grows every day and do cases of fraud and selling of fake products under the guise of the genuine one. To save money and be assured of getting the genuine product, order CollaMask in the UK on the official website only the link to which is below.

PHYSICIAN'S OPINION

Anna, cosmetologist:

"The mask indeed effectively cope with the signs of aging and helps to harmonize even profound changes taking place in the inner layers of the dermis with the age. The result of the use is a young, fit, beautiful and healthy skin. Feedback from my clients about CollaMask in the UK is 100% positive and

therefore I recommend it to everyone who comes to me with skin flaws. By the way, the mask can be used by men as well, which is beneficial because there is no need to buy different products for different family members.
